

## Preventative Maintenance: Oil Changes Done Right!

Join us to discuss all of the procedures, tips / tricks and safety requirements of performing your own oil change. Afterward, we invite you to bring your plane along for some hands-on guidance from the pros.

**Directions:** We are the large hangar adjacent to the east end of the Terminal Building. If you are flying in please park in transient parking at the terminal. If you are driving, there is a large parking lot that with plenty of space, you can then walk through the terminal to gain access to the ramp - we are to the right.

### A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
